Program Syllabus

— PROGRAM OVERVIEW

AI Adoption as a Banking Growth Driver

Tailored specifically for JSC Credo Bank, this AI program focuses not on general theory, but on **increasing operational efficiency**, **process automation**, and **supporting managerial decision-making** in the real work environment.

Operational Efficiency

Accelerating routine tasks, B2B/B2C communications, document analysis, and daily reporting processes up to 10x using hands-on AI tools.

Multi-Agent Ecosystem

Integration of Gemini Gems, Custom GPTs, and workflow automation (n8n/Make) to build personalized, specialized AI assistants for Credo Bank departments.

AI Risks & Regulations

In-depth understanding of the EU AI Act, data privacy (GDPR/confidentiality), and Shadow AI prevention principles in the financial sector.

Adoption & Change Management

Building a prioritization matrix, AI ROI assessment, and 90-day implementation roadmap to ensure successful knowledge transfer and adoption across teams post-training.

— TRAINING PROGRAM

Syllabus for Practical AI Application & Integration

A 4-session training curriculum (3.5 hours each), combining advanced AI technologies, hands-on exercises, and real-world banking use cases.

1

AI FOUNDATIONS, BANKING SECURITY & PROMPT ENGINEERING

SESSION 1

3.5 Hours (210 mins)

▼

MODULE 1 · 70 MINS

Modern AI Landscape 2026 & Banking Security

→ LLM Evolution:

How reasoning-oriented models work.

→ 2026 Landscape:

Comparison of GPT-5.4, Claude 4.6, Gemini 3.1, and DeepSeek V3.2.

→ Security & Privacy:

GDPR, National Bank regulations, and customer data protection.

→ Fact-Checking:

Mechanisms of AI hallucinations and minimizing them in financial reporting.

MODULE 2 · 70 MINS

C.R.E.A.T.E Prompt Design Framework for Managers

→ C.R.E.A.T.E:

Context, Role, Explicit Details, Adjectives (format/tone), Templates, Evaluation.

→ Advanced Prompt Engineering:

Few-Shot learning, Structured Reasoning, and Role Prompting in practice.

→ Thinking Partner:

Using AI as a peer for strategic brainstorming and decision-making.

MODULE 3 · 70 MINS

Managerial & Crisis Communication Workshop

- **Official Correspondence:** Generating context-specific, empathetic customer letters and official notifications.
- **B2C Communication Adaptation:** Tailoring credit/banking offers for diverse customer segments.
- **Iterative Refinement:** Step-by-step prompt tuning to achieve flawless formatting and tone.

 PRACTICAL LAB (SESSION 1)

- 1

CREATE Banking Prompt
Generating an empathetic, legally compliant notification regarding complex financial decisions.

20 min
- 2

Crisis Communication
Drafting an official PR statement using the PARTS framework regarding temporary service downtime.

15 min

View Hourly Agenda ▲

- 10:00 - 11:10

AI Logic & Banking Security (70 Mins)
Generative AI in finance. GPT-5.4 vs. Claude 4.6 comparison. Data anonymization rules.
- 

Coffee Break — 10 Minutes
- 11:20 - 12:30

CREATE Framework & Prompt Engineering (70 Mins)
Prompting framework tailored for Credo Bank managers. Few-shot and role prompting in practice.
- 

Short Break — 10 Minutes
- 12:40 - 13:50

Managerial & Crisis Communication (70 Mins)
Empathetic and official correspondence drafting. Live case testing and summary.

2

INFORMATION RESEARCH, DATA ANALYTICS & REPORTING
SESSION 2

3.5 Hours (210 mins)

MODULE 1 · 70 MINS

Advanced Research & Knowledge Base Management

- **Perplexity Deep Research:** Banking market analysis, competitor research, and 2026 trends.
- **Google NotebookLM Studio:** Analysing internal banking policies, JCI guidelines, and complex documentation.
- **Digital Memory:** Structuring bank knowledge bases and maximizing retrieval efficiency.

MODULE 2 · 70 MINS

Data Analytics & Visualization with AI

- **Claude for Excel & Python:** Fast processing of financial spreadsheets and CSV data.
- **Rows AI:** Automated formulas, charts, and data visualization in under 2 minutes.
- **Financial Analysis:** Processing loan portfolios and branch performance statistics.

MODULE 3 · 70 MINS

Sentiment Analysis & Banking Reporting

- **Sentiment Analysis:** Mass classification of customer satisfaction and reviews.
- **Chain-of-Thought (CoT):** Logically structured prompting to extract financial risks.
- **Automated Reporting:** Draft insights, summaries, and action recommendations from analysis.

 PRACTICAL LAB (SESSION 2)

- 1

NotebookLM Base
Loading internal bank guidelines to build an instant onboarding Q&A base.

20 min
- 2

CRM Feedback Classifier
Processing customer survey spreadsheets and auto-tagging sentiment using Rows AI.

20 min

View Hourly Agenda ▲

10:00 - 11:10

Information Research & NotebookLM (70 Mins)

Perplexity Deep Research for market analysis. NotebookLM for banking policy analysis without hallucinations.

Coffee Break — 10 Minutes

11:20 - 12:30

Data Analytics & Rows AI (70 Mins)

Fast Excel/CSV processing using Claude. Automatic generation of charts and formulas using Rows AI.

Short Break — 10 Minutes

12:40 - 13:50

Sentiment Analysis & Reporting (70 Mins)

Automated categorization of customer complaints. Extracting financial risk parameters using CoT prompting.

3

CORPORATE AI ASSISTANTS & NO-CODE WORKFLOW AUTOMATION

SESSION 3

3.5 Hours (210 mins)

MODULE 1 • 70 MINS

Building Custom AI Assistants (Gems/GPTs)

- **Gemini Gems & Custom GPTs:** Constructing bespoke assistants configured for department-specific tasks.
- **System Instructions:** Designing Identity, Constraints, Tone, and Target Output.
- **Knowledge Files:** Loading Credo Bank policy files into assistant memory.

MODULE 2 • 70 MINS

Principles of No-Code Automation (n8n & Make.com)

- **Trigger & Action:** Seamless data flows from banking web forms to AI and Excel.
- **Workspace Integration:** Linking Google Sheets, MS Office, and Slack/Teams channels to AI.
- **Automated Alerts:** Setting up auto-distribution of daily performance reports.

MODULE 3 · 70 MINS

SOP Automation using Notion AI

- **SOP Management:** Digitizing Standard Operating Procedures using Notion AI.
- **Corporate Memory:** Structuring a Branch Manager Dashboard with interconnected databases.
- **Automated Tracking:** Building task assignment and performance monitoring flows.

 PRACTICAL LAB (SESSION 3)

- 1

Custom Gem-e Creation
Configuring a "Credo Bank Branch Manager Assistant" on Gemini Gems.

25 min
- 2

SOP Automation
Asembling a sandbox automated workflow using n8n/Make.com for incoming applications.

20 min

View Hourly Agenda ▲

10:00 - 11:10

Custom GPTs & Gemini Gems (70 Mins)
Programming specialized assistants. Defining Identity, constraints, and knowledge files.

 Coffee Break — 10 Minutes

11:20 - 12:30

No-Code Automation Basics (70 Mins)
Trigger & Action workflows on n8n/Make.com. Connecting web forms and workspaces to AI.

 Short Break — 10 Minutes

12:40 - 13:50

SOP Automation with Notion AI (70 Mins)

Digitizing operational procedures and testing a Branch Manager dashboard.

4

AGENTIC WORKFLOWS, AI GOVERNANCE & ADOPTION STRATEGY

SESSION 4

3.5 Hours (210 mins)

MODULE 1 · 70 MINS

Multi-Agent Ecosystems of AI Agents

- **AI Agents:** The role of autonomous agents in 2026 banking operations.
- **Microsoft Copilot Studio & Custom Agents:** Programming agents for Credo Bank's internal flows.
- **Human-in-the-Loop (HITL):** Operating agents under mandatory human approval constraints in financial transactions.

MODULE 2 · 70 MINS

AI Policy (Data Governance) & Risks in Banking

- **EU AI Act 2026:** EU regulations and their impact on the Georgian financial sector.
- **Shadow AI Prevention:** 4 steps to prevent unauthorized AI tool utilization.
- **Prompt Injection & Cyber Security:** Protecting AI layers from manipulation and data leaks.

MODULE 3 · 70 MINS

Implementation Roadmap & ROI

- **Prioritization Matrix:** Impact vs. Feasibility framework for selecting high-value use cases.
- **ROI Analysis:** Comparing AI licensing costs against accumulated time savings.
- **Change Management:** Cultivating employee readiness for AI and presenting final Capstone projects.

 PRACTICAL LAB (SESSION 4)

- 1

Adoption Roadmap

20 min

Building a 90-day action plan and prioritization matrix for your specific department.
- 2

AI Risk Assessment

15 min

Auditing risk vectors of a specific Credo Bank use case and drafting safety protocols.

View Hourly Agenda ▲

- 10:00 - 11:10

Multi-Agent Ecosystems & AI Agents (70 Mins)

Concept and application of autonomous AI agents. Practical Microsoft Copilot demo.
-  **Coffee Break — 10 Minutes**
- 11:20 - 12:30

AI Governance & EU AI Act (70 Mins)

Financial security, AI policy standards, Shadow AI prevention, and cyber security guidelines.
-  **Short Break — 10 Minutes**
- 12:40 - 13:50

Implementation Roadmap & ROI (70 Mins)

Use case prioritization, 90-day roadmap, Change Management, and final wrap-up.

— TRAINING METHODOLOGY

Practical, Interactive & Business-Oriented Approach

Our training methodology focuses on maximizing participant engagement, ensuring theoretical concepts are immediately transformed into practical skills.

Interactive Workshops

Every theoretical module concludes with a live demonstration and active hands-on labs executed by participants on their own laptops.

Banking Case Studies

Using real-world international and local financial case studies directly relevant to Credo Bank's daily operational workflows.

Collaborative Problem-Solving

Participants collaborate in team breakout groups to analyze AI implementation scenarios and solve operational roadblocks.

Experience Sharing & Peer Review

Interactive discussions and peer review sessions where managers exchange best practices on AI utilization and efficiency gains.
