To: **Kamila Alimdjanova**
Associate, SME Finance & Development
European Bank for Reconstruction and Development

Subject: Expression of Interest - AI Programme for SME Advisors

Dear Ms. Kamila Alimdjanova,

Loialté LLC is pleased to submit this Expression of Interest in response to the EBRD's Request for Expressions of Interest for the **AI Programme for SME Advisors**. We wish to be included in the Bank's register of pre-qualified consulting firms eligible to deliver all or parts of the Programme across the EBRD's countries of operation in Central Asia.

We would be honoured to be considered for inclusion in the Bank's register and remain at your disposal to provide any further information or clarification the Committee may require.

Thank you for your consideration.

We look forward to the possibility of discussing our proposal further.

Name of the Entity:	Loialte LLC
Type of Entity:	Limited Liability Company
Address:	Gazapkhuli Street 10a
Telephone:	+995 555 09 11 00
E-mail:	Giga.phaikidze@loialte.com.ge
Taxpayer Identification Number:	405277347

Sincerely,

Grigoli Phaikidze, Managing Partner

Signature:

Company Profile

Mission and Vision

Loialté, established in 2018, is a consulting firm committed to fostering sustainable economic development and empowering businesses across dynamic global markets. With a robust foundation in **Georgia**, Loialté has strategically expanded into **Uzbekistan and the UAE**, today employing approximately 120 staff and engaging more than 250 internal and associated consultants. Our mission is to cultivate the growth and resilience of micro, small and medium-sized enterprises (MSMEs) by delivering bespoke solutions that enhance operational efficiency, ensure financial stability, and bolster market competitiveness.

Central to our mission is a strong commitment to developing and sustaining MSMEs in emerging markets. This focus is reflected in the broader Loialté ecosystem, which includes the Loialté Academy and Loialte Digital (Tbilisi and Tashkent) and the Small and Medium Enterprises Development Association (SMEDA) in Georgia. Together these entities deliver a synergistic blend of formal education, market-driven training, and grassroots SME support.

Group Structure

Loialté Strategy	Strategic planning, organisational development, operational optimisation and policy advisory for public and private clients, including SMEs.
Loialté Academy	Practice-based training, customised corporate programmes and market-driven courses in leadership, operations, technology and digital transformation, IT, digital marketing and agile project management. Branches in Tbilisi (Georgia), Batumi (Georgia) and Tashkent (Uzbekistan).
Loialté Digital	Digital-transformation blueprints, bespoke software, cloud architecture and data-intelligence services that future-proof operations.
Loialté 4SME	Dedicated MSME unit – capacity building, access to finance, market integration.
Loialté Research & Development	Market research, economic analysis and evidence-based policy work for public and private sectors.
HIRO (HR Solutions)	HR outsourcing, audit, payroll, recruitment, EVP/branding, performance systems, learning programmes and onboarding.
Tax, Accounting, Audit & Valuation	Tax advisory, accounting outsourcing, ISO-certified bookkeeping, independent IFRS audits, SARAS-ready financial statements and IP/asset valuations.
Loialte Group in Uzbekistan (affiliated)	Market entry services, Tax, Accounting, legal services for SMEs.

Loialte Digital in Uzbekistan (Affiliated)	IT infrastructure audit, software development, IT Consulting, AI training development and delivery.
SMEDA (affiliated)	Small and Medium Enterprises Development Association of Georgia – Loialté's grassroots delivery and convening partner, part of Loialte.

Geography

Primary Company Presence	Georgia · Uzbekistan · UAE
Active project countries	Georgia, Uzbekistan, Tajikistan, plus Eastern Partnership region (Helvetas Reconomy, Visegrad Fund e-platform spanning EaP and V4 countries)
Central Asia readiness	Permanent operational base in Tashkent (Uzbekistan) via Loialté Academy; existing programme delivery to women-led SMEs (UNDP); active Tajikistan engagement under World Bank funding;
Madiba partner coverage	Madiba Group adds 70+ countries across 5 continents - strengthening EBRD-region capability through Egypt delivery experience and German cooperation networks

Languages of Delivery

- **English** - full curriculum, materials, training and reporting.
- **Russian** - full curriculum and training delivery, including written materials.

Track Record by the Numbers

- **100+** SME engagements completed or in delivery under the Enterprise Georgia / World Bank Growth Hub programme alone.
- **250+** trained entrepreneurs across the Starta and women's empowerment programmes.
- **1,400+** green-finance projects assessed for Enterprise Georgia (NELE / Sparkassenstiftung).
- **4 commercial banks** (Bank of Georgia, TBC Bank, Liberty Bank, Terabank) supported on Climate Risk and EIB Green Lending Framework adoption.
- **ISO 9001:2015** certified Quality Management System covering project delivery and consulting services.

AI Capability Statement

Loialté treats Artificial Intelligence not as a separate practice line but as a transversal capability that strengthens every service we deliver to SMEs and to the institutions that support them. The capability is built on four pillars.

- **In-house Digital and Data Practice (Loialté Digital)**

Loialté Digital provides digital-transformation blueprints, bespoke software, cloud architecture and data-intelligence services. The Loialte has delivered:

- CRM and sales-automation re-engineering with AI-supported lead-scoring and customer-journey workflows (WYZO LLC, with EBRD support, 2025).
- Design of an AI SME Assistant - FAQ corpus, decision trees, escalation logic - embedded in TBC Bank's digital SME channels (2025–2026).
- SME digitalisation needs assessment across five regions of Georgia, including AI readiness diagnostics (GIZ EU4Digital, 2025–2026).
- Pilot Digital Business Accelerator for women entrepreneurs, with practical training in digital tools, online sales and analytics (USAID Economic Governance Programme, 2022).

● **Loialté Academy as the Training Engine**

Loialté Academy is the Group's dedicated training arm, operating under a structured course catalogue across Business Management & Strategy, Operational Management, Regulations & Compliance, Skills Development, Finance & Tax, FinTech and Digital Technologies. The Academy delivers in three formats - online, in-person and hybrid - and serves both open enrolments and corporate clients (testimonials on file from LLC Maxima, LLC Crystal, LLC Optimo, LLC FLO and others).

The Academy is the operational platform through which the AI Programme for SME Advisors will be localised, delivered and certified.

● **Sector-Specific AI Applications We Have Delivered or Are Delivering**

AI for Banking / SME Enablement	AI SME Assistant design and content training corpus for TBC Bank's digital SME channels; co-design of segment-specific learning content on finance, compliance, growth and digitalisation.
AI for Sales & Marketing	End-to-end automated campaign workflows, lead generation funnels and CRM structures delivered for WYZO LLC (e-commerce SaaS expanding across Tajikistan, Uzbekistan, Kazakhstan and Georgia) - under an EBRD-supported assignment.
AI for Advisory Productivity	Internal use of AI for diagnostics drafting, proposal preparation, monitoring & evaluation analytics and client communications across the Growth Hub network in Georgia.
AI-Adjacent Digital Skills for Youth & Women	Digital Marketing Academy under UNDP - 90 youth participants, 210 hours of training, including content-creation and analytics tools widely augmented by AI.

● **Responsible AI Posture**

Loialté embeds Responsible AI principles into all advisory and training work. Our Legal practice supports SMEs on Georgia's Law on Personal Data Protection, including Data Protection Officer (DPO) appointments

and data-handling audits already delivered for regulated sectors (e.g. regional dental clinics under the Growth Hub programme). For training audiences, we operationalise responsible AI through:

- Practical guidance on data sensitivity, confidentiality and avoidance of sensitive-data exposure to public AI tools.
- Use-case triage - distinguishing situations where AI delivers genuine SME benefit from those where it adds complexity, cost or unmanaged risk.
- Emphasis on continued professional judgement and human oversight.
- Alignment with EU AI Act principles and the Bank's responsible-finance and integrity standards.

Strategic Partnership with Madiba Group on AI

Madiba Group GmbH (Bonn, Germany) is an established consulting and training firm with a strong track record across Africa, the MENA region, Eastern Europe and Central Asia. Madiba's Training, Learning and Consulting (TLC) unit has delivered specialised training programmes commissioned by the German Federal Foreign Office (Auswärtiges Amt), the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), the German Federal Ministry for Economic Affairs and Climate Action (BMWK), and the Academy for International Cooperation (AIZ). Madiba has worked on projects in more than 70 countries across five continents.

● The Cooperation Memorandum

Loialté and Madiba have entered into a Cooperation Memorandum in 2025, signed in Bonn, Germany to jointly deliver AI training programmes for SME advisors and SMEs in Loialté's countries of operation. Under this Memorandum:

- **Madiba** contributes the core AI-for-SMEs curriculum, master trainers, international quality assurance and the methodology already field-tested in earlier deliveries.
- **Loialté** contributes the local delivery infrastructure (Loialté Academy in Georgia and Uzbekistan), local-language adaptation, participant recruitment, MSME networks, advisory linkages, monitoring & evaluation systems and post-training mentoring support.
- **Joint deliverables** - co-branded curriculum and toolkits, certified trainer pool, cohort delivery, mentoring follow-up and impact measurement.

● Proven Delivery: AI Training in Egypt

Madiba has already delivered the AI training programme to participants in Egypt, generating an evaluated and refined curriculum that is now ready for replication. Key features carried forward from the Egypt delivery include:

- A modular, practice-oriented design tailored for non-technical professionals.
- Case-based and exercise-led learning rather than theoretical lecture.
- Emphasis on responsible AI, data protection and human oversight.
- Practical AI toolkits and templates that participants can immediately apply in their workplace.

- **Current Roll-out in Georgia**

Following the Egypt delivery, the next national roll-out under the Memorandum is currently in mobilisation in Georgia. Loialté is presently receiving applications from Georgian SMEs to participate in the programme, which will be delivered through Loialté Academy with Madiba's master trainers and Loialté's certified local facilitators. This pipeline confirms operational readiness and demonstrates that the joint delivery model is mature, not theoretical.

- **Combined Capability for Central Asia**

The Loialté–Madiba partnership directly addresses the consultant profile sought in the EBRD RFI:

- **AI expertise:** Madiba's curriculum and Loialté Digital's applied data-and-AI projects.
- **SME training capability:** Loialté's Growth Hub, Starta and UNDP Acceleration tracks; Madiba's GIZ-commissioned training delivery worldwide.
- **Non-technical, business-oriented communication:** both partners have built their training reputation on translating technical content for business audiences.
- **Responsible AI and risk literacy:** Loialté's data-protection legal practice plus Madiba's exposure to European AI governance frameworks.
- **Emerging-market and Central Asia footprint:** Loialté in Georgia and Uzbekistan; Madiba's extensive experience in fragile and emerging contexts.

Proposed Methodology and Approach

Our proposed contribution maps directly to the three programme components identified in the EBRD's Request for Expressions of Interest. The narrative below sets out for each component the learning logic, the indicative content, the delivery formats, and the outputs participants will leave with.

- **Component A: AI as an Enabler of Productivity and Quality for SME Advisors**

Objective

Equip SME advisors to use AI in their own advisory practice to improve the speed, quality, consistency and structure of analysis, diagnostics, proposals, reports and client communications, while preserving professional judgement.

Indicative content

- AI fundamentals for advisors, what generative AI is and is not; useful mental models; cost/value trade-offs.
- Practical toolkit using AI for fast desk research, drafting business diagnostics, financial commentary, executive summaries, board memos and proposal narratives.
- Quality and structure - prompt-craft for advisory deliverables; templates for SME diagnostics and growth plans; checklists for fact-verification and source citation.
- Productivity workflows, how to redesign a typical advisor's week with AI assistance (intake, diagnosis, analysis, deliverable, follow-up).
- Hands-on exercises while every participant leaves with at least three AI-augmented templates ready for immediate use with their next client.

Delivery format

Workshop-based learning combining short conceptual inputs, live demonstrations on real advisory tasks, and supervised exercises using participants' own client situations (anonymised). Hybrid delivery is available.

- **Component B: AI for SMEs - Readiness, Use Cases and Implementation**

Objective

Enable advisors to identify realistic, high-value, low-complexity AI use cases for the SMEs they support, and to walk SMEs through the early stages of adoption, embedding simple AI solutions into existing business processes.

Indicative content

- AI readiness diagnostic - a structured assessment tool covering data maturity, process readiness, leadership commitment, technical infrastructure and skills.
- Use-case library - a curated, sector-relevant catalogue of AI use cases drawn from Loialté's portfolio: AI-assisted customer service, marketing copy generation, lead scoring, document processing, accounting automation, inventory and demand forecasting, content localisation, multilingual sales support.

- "Buy vs. build vs. ignore" framework to help SMEs choose between off-the-shelf tools, custom integrations, and waiting.
- Implementation roadmap to pilot design, success metrics, change management for small teams, vendor selection and cost control.
- Demonstrating business impact for practical indicators (time savings, cost reductions, quality improvements, staff adoption) and templates for before-and-after measurement.

Delivery format

Case-based workshops with live SME participation where feasible. Advisors work in small groups on real or simulated client briefs and produce an AI Readiness Report and a 90-Day Pilot Plan.

- **Component C: Responsible and Practical AI (Governance, Risk and Trust)**

Objective

Build participants' confidence to use and recommend AI responsibly, managing data sensitivity, confidentiality, risk, regulatory exposure and the trust dimension with SME clients.

Indicative content

- Responsible-AI principles - fairness, transparency, accountability, human oversight, data minimisation; how these translate into day-to-day choices.
- Data protection, what data is safe to put into public AI tools and what is not; client confidentiality; aligning with national data protection laws and with EU GDPR/AI Act expectations.
- Risk register for AI adoption - common failure modes (hallucination, bias, security, vendor lock-in, reputational risk); mitigation strategies appropriate to SME budgets.
- The role of human judgement, when AI augments expertise and when it must not replace it; documenting professional judgement; explainability to clients.
- Practical governance for advisors - a simple internal AI use policy template, a client-disclosure standard, and an escalation pathway for sensitive use cases.

Delivery format

Combination of facilitated discussion on real-world scenarios, structured role-plays (e.g. advisor explaining AI use to a sceptical SME client), and a take-home Responsible-AI Toolkit.

- **Monitoring, Evaluation and Impact**

Building on our Monitoring & Evaluation framework, refined through the Enterprise Georgia Growth Hub programme and the UNDP Uzbekistan SME Skills Acceleration design, we propose a standard impact-tracking pack:

- Pre- and post-training competency assessments aligned to each component's learning outcomes.
- Participant satisfaction and Net Promoter Score (NPS) measurement.
- 90-day and 6-month follow-up surveys to capture behavioural change and downstream SME impact (time saved, processes automated, AI tools adopted, revenue / cost effects where attributable).
- Cohort dashboards and donor-ready reporting templates.
- ISO 9001:2015 quality-management coverage of the entire delivery cycle.

Team of Experts

Expert	Assigned Component	Short Bio/profile
Dr. Vladimer Napetvaridze	Component A AI as an Enabler of Productivity and Quality for SME Advisors	Dr. Napetvaridze is Senior Consultant for AI and Digitalisation at Loialte , Assistant Professor at Ivane Javakhishvili Tbilisi State University, Associate Professor at GIPA, and Senior Researcher at the Institute of Political Sciences, Ilia State University. He is co-founder of the Georgian AI Association (GAIA) and a former Visiting Fellow at Ghent University (imec-mict-UGent), researching how small states build critical AI capabilities. Under the GIZ DT4SME programme , he researched the digital transformation of Georgian SMEs across five economic sectors and identified the main barriers to technology adoption. He then designed and delivered the training programme “AI for Business: From Theory to Practice” for SME managers , structured in two levels: foundations of AI for business (frameworks and risks), AI-assisted research and information retrieval, marketing, content creation and customer communication; followed by a growth phase covering chatbots, AI-supported decision-making and business-process automation.
Dr. Giorgi Basilaia	Component B AI for SMEs – Readiness, Use Cases and Implementation	Dr. Basilaia is an AI Enablement Specialist and PhD Engineer with 15+ years of leadership in digital transformation, currently IT Director of the dual-campus Free University and Agricultural University of Georgia (10,000+ stakeholders, 99.9% uptime), Associate Professor in Information Security Management, and AI Trainer at Smart Academy. His core strength is converting ambiguous business problems into structured AI use cases and configuring no/low-code agents (Make.com, n8n) that solve real problems in sales, marketing, content operations and customer service . He is the author of two practitioner courses - “ AI – Artificial Intelligence in Practice ” (chatgpt.ge) and “ AI Assistants, Agents and No-Code Automation ” (Make.ge) - and holds the Google AI Professional, Gemini Certified Educator, Anthropic Certified Claude Expert, ISC2 Certified in Cybersecurity and AWS Academy Educator credentials. He has served as Technical Lead on a USAID specialist learning programme (AID-114-A-12-00002), contributed to Erasmus+ HEIn4 (Industry 4.0) and TEMPUS DIMTEGU.
Prof. Dr. Thomas Hoffmann	Component C Responsible and Practical AI – Governance, Risk and Trust	Prof. Hoffmann is Tenured Associate Professor of Private Law at TalTech Law School (Tallinn University of Technology) , a qualified German lawyer (Rechtsanwalt), and Of Counsel at bnt attorneys in CEE in Tallinn. Since 2021 he has designed and delivered the master-level course “ Artificial Intelligence and Law ” (MOT5060), covering trustworthy AI principles, ethical and regulatory frameworks (including the EU AI Act and GDPR), liability for autonomous and AI-supported systems, AI in decision-making, data-protection compliance and human oversight. He is Principal Investigator (on behalf of TalTech) on four ongoing European Commission projects on AI-enabled and algorithmic legal services - CREA3 (Conflict Resolution with Equitative Algorithms), IDEA (I-tools for Access to Justice), DEUCE (Digitalising Uncontested Claims Enforcement) and TRACE4EU (EBSI blockchain traceability) - with combined budgets exceeding EUR 5.8 million. He has acted as national expert and country reporter on more than 15 EC and European Parliament tenders covering digital contracting, algorithmic management of workers, data and disclosure, restructuring and consumer protection.

Relevant Experience & References

The references below are selected for direct relevance to the EBRD AI Programme for SME Advisors. They illustrate (a) Loialté's existing SME-advisor capacity-building practice, (b) prior digital and AI-adjacent assignments, and (c) prior delivery for EBRD and comparable IFIs.

- **SME Advisor Capacity-Building Programmes**

Reference 1 — Design Comprehensive SME Skills Acceleration Programme for Women Entrepreneurs in Uzbekistan

Client / Funder	UNDP Uzbekistan (programme approved by UNDP Istanbul International Centre for Private Sector in Development)
Location	Uzbekistan (Tashkent)
Duration	4 months · July 2025 – October 2025
Role	Lead
Total Budget	USD 60,125
Description	Design and roll-out of a gender-responsive acceleration model for established women-led SMEs in Uzbekistan, equipping participants with strategic, operational and digital capabilities to drive sustainable growth, access to finance and market integration. Loialté produced: • 24-session sector-tailored curriculum with localised examples, exercises and practical tools • Study Guide, Instructor's Manual, Mentors' Guide, Mentorship Delivery Handout • 5-day ToT for 40 trainers (Tashkent) + 2-day mentorship sessions for 60 entrepreneurs • Monitoring & Evaluation Guidelines, pre/post tests, feedback forms, cohort dashboards
Reference contact	Ravshan Yunusov, Inclusive Growth Cluster Lead, UNDP Uzbekistan — ravshan.yunusov@undp.org

Reference 2 — Enterprise Georgia "Growth Hub" Programme Implementation

Client / Funder	Enterprise Georgia ("Produce in Georgia") with World Bank support
Location	Georgia (multi-regional)

Duration	45 months · April 2024 – December 2027 (ongoing)
Role	Leader (largest service provider to the programme)
Total Budget	USD 150,000+
Description	As the strategic implementation partner, Loialté establishes and operates Growth Hubs across Georgia, delivering Finance & Accounting, Tax Advisory, Legal, Business Modelling & Strategic Planning and HR services to MSMEs. Close to 100 SME engagements implemented or under management to date. Selected interventions: • Data Protection Compliance / DPO services for regulated SMEs (regional dental clinics) • Labour-law compliance for multi-sector SMEs • Strategic planning and export-market expansion (Georgia → Uzbekistan) • Tax-risk mitigation and finance & accounting frameworks
Reference contact	Irakli Gabriadze, Deputy CEO, Enterprise Georgia — i.gabriadze@enterprise.gov.ge

Reference 3 — Digital Business Acceleration Programme for Entrepreneurs (Starta)

Client / Funder	USAID Unity Through Diversity (UN Association of Georgia – sub-contractor)
Location	Georgia (Tbilisi, Adjara, Samtskhe-Javakheti)
Duration	60 months · October 2022 – January 2025
Role	Sub-Contractor (lead delivery partner)
Total Budget	USD 236,670
Description	Multi-cohort digital business acceleration programme: 5 groups of 25–30 entrepreneurs (~120 trained), 15 regional awareness meetings reaching ~300 entrepreneurs, 45 individual consultations, 4 regional events, 2 webinars, ~100 entrepreneurs joined the Starta Business Club. M&E framework documented a 40% increase in digital adoption among participating businesses and a 25% average revenue growth within six months of completion.
Reference contact	Rusudan Chanturia, Deputy Chief of Party, USAID Unity Through Diversity — rchanturia@una.ge

Reference 4 — Pilot Digital Business Accelerator Programme for Women's Empowerment

Client / Funder	USAID Economic Governance Programme (small grant)
Location	Georgia
Duration	12 months · September 2021 – August 2022
Role	Leader
Total Budget	USD 28,500
Description	12-month programme blending training (84 hours), mentoring and consulting to enhance women entrepreneurs' digital business strategies. 24 women entrepreneurs trained; alumni and networking group established; Facebook reach of 907,369.
Reference contact	Maia Eristavi, CSO Strengthening Component Lead, USAID EGP — meristavi@egp.ge

- **Digital, Data and AI-Related Assignments**

Reference 6 — Marketing Strategy and Sales Automation for WYZO LLC (EBRD)

Client / Funder	WYZO LLC, with EBRD support
Location	Uzbekistan / Tajikistan (with expansion targets in Kazakhstan and Georgia)
Duration	3 months · July 2025 – October 2025
Role	Leader / Consultant
Total Budget	EUR 18,750
Description	WYZO is a fast-growing e-commerce SaaS platform serving SMEs across Central Asia. Loialté delivered a Marketing & Sales Audit and Competitive Analysis across 4 markets, a Strategic Marketing Plan, CRM and automated-campaign workflows, and two online trainings on Lead Generation & Funnels and CRM & Campaign Automation. The assignment included AI-supported lead-scoring and customer-journey automation directly relevant to AI-for-SMEs use cases.
Reference contact	Available on request via EBRD ASB

Reference 7 — SME Support Ecosystem with TBC Bank (incl. AI SME Assistant)

Client / Funder	TBC Bank
Location	Georgia
Duration	12 months · May 2025 – ongoing
Role	Partner
Description	Design and operation of a digital SME enablement ecosystem for TBC Bank's SME segment. Scope includes content strategy across remote/digital channels, micro-learning production on financial literacy, accounting & taxes, compliance, business modelling, sales & marketing, digital transformation and HRM. Key AI deliverable: design and training of an AI SME Assistant — FAQ corpus, decision trees, escalation logic — embedded in TBC's digital channels, plus a stakeholder co-funding model that reduces unit delivery cost over time.
Reference contact	TBC Bank SME Banking Division (on request)

Reference 8 — Needs Assessment for SME Digitalisation in Georgia

Client / Funder	GIZ EU4Digital
Location	Georgia (5 cities)
Duration	3.5 months · December 2025 – March 2026
Role	Leader
Total Budget	EUR 15,000
Description	Identification of digitalisation needs, challenges and opportunities for SMEs in Manufacturing, Agriculture, Construction, Tourism and Trade. Methods: desk review of policies and donor initiatives, 30 semi-structured key-informant interviews, focus-group workshops in 5 cities. Output: evidence-based recommendations for sustainable digital-support mechanisms — directly relevant to the diagnostic methodology underpinning the EBRD AI readiness component.
Reference contact	Niclas Rüffer, Team Lead, GIZ EU4Digital — niclas.rueffer@giz.de

Reference 9 — Access to Finance: National SME Forums & Digital Learning with Bank of Georgia

Client / Funder	Bank of Georgia
------------------------	-----------------

Location	Georgia (national)
Duration	15 months · February 2023 – May 2024
Role	Partner
Description	Nationwide forum series with banks, NBG, state programmes and donors; on-demand training library on financing instruments; Starter Packages for newly registered Bank of Georgia clients across accounting, tax, legal, HR, compliance, marketing/branding and IT basics. ~1,000 SMEs reached through forums and several thousand additional touchpoints via recorded trainings.
Reference contact	Bank of Georgia SME Banking (on request)
